

Dr. Giorgio Russo

Summary

In over 35 years of experience in the IT sector, I have collaborated with numerous companies, from emerging startups to the largest Italian and foreign companies, such as TelecomItalia, Etnoteam, Finmeccanica, Datamat, Finsiel, Alten and many others.

I have been an Entrepreneur, Management Consultant, CTO, Software Architect and Project Manager, and I have designed, developed and implemented complex software platforms, and led many development teams.

In addition to providing solutions and coaching programs with my small organization, I personally provide my work as a consultant, exclusively on truly stimulating projects or situations, offering leadership, experience, skills and an energy and passion far from what my chronological age might indicate.
